> Extensive Standard Range

Metal Systems for Roofing, Cladding and Flooring

The Flashing Product Range

As part of our on-going commitment to develop integrated solutions for the construction industry, Tegral Metal Forming offers a comprehensive array of metal flashings.

The selection of flashings at Tegral is divided into four different product categories:

- Roofing and Cladding Flashings
 - Structural Flashings •
 - Metal Design Flashings •
 - Pressed Profile Flashings •

Products are manufactured to the highest standards at our manufacturing plant in Athy, Co Kildare and meet the stringent requirements of quality assurance systems to ISO 9002.

Standard Range and Custom Flashings

Tegral Metal Forming offers and extensive range of standard flashings. These are available in standard materials, colours, gauges and girths. Please refer to the individual flashings products in the brochure to determine the stand specification.

In addition to our standard range we also offer a custommanufacturing facility which was developed with maximum flexibility in mind. Please refer to the Custom Flashings section of this brochure for further information.

For your convenience, we have also produced a selection of order forms to make ordering your flashing as simple ad straightforward as possible. Please use these order forms to ensure your order is processed as effectively and as accurately as possible.

Prompt Deliveries

Once an order is placed at our manufacturing plant, our aim is to create the product as quickly and carefully as possible.

Under certain conditions Tegral Metal Forming is proud to offer 24 hour turnaround service* on standard orders. However, when Flashings are part of a larger order, the Flashings team ensures that both orders are completed and delivered at the same time.

* Note: Restrictions apply such as pick up location etc and service depends on pricing, volume and time ordered. Please ask your customer service representative for more details.

The Flashings Team

Tegral Metal Forming has a dedicated Flashings team that includes **two manufacturing technicians**, a **design engineer and a customer service professional**. The sales Team liaises closely with the Flashing Team and serves as the conduit between the customer and the order. Each member of the Flashings team has extensive product knowledge and is available to provide information and support to help you with your project.

Standard Range

Standard Selection & Custom Orders

Tegral Metal Forming offers an extentensive range of standard flashings. In addition to standard designs, it is important to note that some flashing products are available in a range of different shapes and styles, i.e. for example, curved or tapered. Tegral Metal Forming also fulfils custom orders. While certain limitations may apply, the Flashings Team will work with you to create a tailored- made product that is suitable for your needs. To facilitate custom order requests, Tegral Metal Forming has developed a "Design Your Own Flashing" order form where you can illustrate your requirements simply and efficiently.

Standard Materials

Flashing are offered in a selection of standard materials that include -

AGRIBILD®
GALVANIZE
HPS200®
COLORGALV®
CELESTIA®

Custom Flashings

When it comes to manufacturing customised flashings, the design engineers and technicians at Tegral Metal Forming have the experience, expertise to produce superior quality one-of-a kind products. These include curved flashings, mitred corners, gutter corners and louvres. Each of these products can be made to your specification in a wide range of girths, gauges and in an array of colours. Additionally, customer orders can be finished with welted ends on request.
